Period for Reply -- The MAILING DATE of this communication appears on the cover sheet with the correspondence address --

A SHORTENED STATUTORY PERIOD FOR REPLY IS SET TO EXPIRE 3 MONTH(S) OR THIRTY (30) DAYS, WHICHEVER IS LONGER, FROM THE MAILING DATE OF THIS COMMUNICATION.

- Extensions of time may be available under the provisions of 37 CFR 1.136(a). In no event, however, may a reply be timely filed after SIX (6) MONTHS from the mailing date of this communication.
- If NO period for reply is specified above, the maximum statutory period will apply and will expire SIX (6) MONTHS from the mailing date of this communication.
- Failure to reply within the set or extended period for reply will, by statute, cause the application to become ABANDONED (35 U.S.C. § 133). Any reply received by the Office later than three months after the mailing date of this communication, even if timely filed, may reduce any earned patent term adjustment. See 37 CFR 1.704(b).

DETAILED ACTION

Claim 4 is pending, claims 1-3 are canceled.

Claim Rejections - 35 USC § 103

The following is a quotation of 35 U.S.C. 103(a) which forms the basis for all obviousness rejections set forth in this Office action:

(a) A patent may not be obtained though the invention is not identically disclosed or described as set forth in section 102 of this title, if the differences between the subject matter sought to be patented and the prior art are such that the subject matter as a whole would have been obvious at the time the invention was made to a person having ordinary skill in the art to which said subject matter pertains. Patentability shall not be negated by the manner in which the invention was made.

1. Claim 4 is rejected under 35 U.S.C. 103(a) as being unpatentable over Rink et al. US 5 863 440 in view of Brinkley US 5 403 478.

Rink teaches a hydrocarbon collecting net comprising: a rectangular frame (240, 250) comprising a periphery formed of polypropylene strips having an upper face and a lower face and a plurality of floating elements (110) located around the frame, a net (200, 210) secured to the frame comprising a plurality of polypropylene strands forming a cross liked area and handle devices (260) located at corners of the frame, the handle devices being provided with connection means for connecting to handle devices of another net (fig. 2, 5, 7, 20, col. 6, lines 51-55, col. 8, lines 17-44). Rink teaches floating elements along the outer edges of the frame does not teach floating element being between the upper face and the bottom face of the frame.

Brinkley teaches a medium and collecting net having a net and floating elements (40) along the edge of the net between an upper and bottom face (fig. 7, 8, col. 9, lines 40-54). Addition of a floatation material is known in the art to attach to net material as shown in both prior art references. Brinkley teaches a known technique of sandwiching the floating material between two surfaces on the inside of the net bag. Because the particular technique is known in the art is recognized as part of the ordinary capabilities of one skilled in the art and the application of the technique as taught by Brinkley would yield predictable results in that the net bag would float. The claim is considered to be obvious over the prior art (KSR International Co. v. Teleflex Inc., 82 USPQ2d 1385 (2007)).

Response to Arguments

2. Applicant's arguments filed 8/11/08 have been fully considered but they are not persuasive. Applicant arguments are not commensurate in scope with the grounds of rejection. The reference to Brinkley '478 was not relied upon to teach polypropylene strands as the primary reference to Rink '440 teaches polypropylene strands.

Conclusion

3. **THIS ACTION IS MADE FINAL.** Applicant is reminded of the extension of time policy as set forth in 37 CFR 1.136(a).

A shortened statutory period for reply to this final action is set to expire THREE MONTHS from the mailing date of this action. In the event a first reply is filed within

TWO MONTHS of the mailing date of this final action and the advisory action is not mailed until after the end of the THREE-MONTH shortened statutory period, then the shortened statutory period will expire on the date the advisory action is mailed, and any extension fee pursuant to 37 CFR 1.136(a) will be calculated from the mailing date of the advisory action. In no event, however, will the statutory period for reply expire later than SIX MONTHS from the mailing date of this final action.
